

Matthew Sheppard

I believe that project Jupiter is a negative thing due to the fact that we already have a lack of water in the desert and project Jupiter is going to be using a lot of water to power their facility as well as increase our electric rates even if they say they aren't they will be and I just don't see it as something that the people approve of so it shouldn't be pushed through just for a pure money gain on the companies I think we need more public opinions to decide something that is happening in our backyard

I urge the New Mexico Environment Department to not approve this important project.

Sincerely,
Matt
