

## Megan Apodaca

New Mexicans deserve transparency on aspects that will affect their quality of life and Yucca Growth Infrastructure LLC has neglected to take New Mexicans opinions, their concerns, and safety into consideration. We already live in a drought and in an area with negative air quality, a development such as Project Jupiter will only exasperate these features. New Mexicans deserve a healthy environment to exist in and Project Jupiter will not contribute to this. There is no proof that the proposed economic prosperity will benefit employees here, as outsourcing these jobs to individuals outside of NM is always a possibility. New Mexicans, regardless of political affiliation, have a love of the land and say NO to Project Jupiter.
