I am asking that you deny Yucca Growth Infrastructure's air quality permit. Think about how much it will affect global warming and climate change as a whole. There is little time to turn back but installing this will only speed up the process. You have the ability to prevent the suffering that many organisms and humans will have to endure. Please help and be the change that is necessary.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."
