

Jaye Williams

As a resident of Dona Ana County, I am opposed to granting this permit at this time. This permit is related to a very large project that continues to leave the citizens unclear as to the ultimate long term impacts to the environment. The citizens deserve a chance to question the developers of this project, as numerous changes to the possible impacts this will have on the citizens and the environment have come forth since the original approval by the Dona Ana County Commission in September 2025.
