I oppose project Jupiter in its entirety. I oppose the construction of a data centre in an area already lacking water. I oppose the construction of a mass polluter of greenhouse gases. I oppose the construction of a building granted planning permission without the public's agreement on it given that it affects them directly and indirectly through water usage, ecosystem damages, and pollution/contribution to climate change. This data centre does not serve the people, it does not benefit the economy, it does not benefit the environment. This data centre will cause far more problems than it will bring solutions. It creates a problem to something that wasn't broken. And for these reasons I oppose the construction of this data centre wholly.

"The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."
