We do not need more AI data centers. Its destroying our planet and its becoming unliveable. Shame on the jupiter project and the billionaires as you're actively destroying the earth. We do not need more of this! We need everyone to step up and actually help the planet instead of destroying it further! The carbon dioxide pollution alone will heat our atmosphere at a much faster pace and promote the formation of even more ground-level ozone. This summer, my 6 year old suffered a seizure while on the playground at school because the extreme heat affected him. If, and Lord forbid, this project is to happen, we would all die in 8 years or less due to the extreme climate change, we as humans can not adapt to these rapid changes
