

KC Washburn

I am writing to express my opposition for Project Jupiter, which I believe offers nothing but strife and destruction for the community.

Project Jupiter is poised to bring substantial resource decline to Doña Ana County. It is anticipated to use entirely too much water in a community and biome that is already in severe drought, which would be made worse by diverting our already precious river and water tables to this unnecessary, undesired, borderline evil project, that no one that I know personally is in support of.

I urge the New Mexico Environment Department to decline this project, and to shelve this conversation ad infinitum. We cannot drink data, and we cannot give up our beautiful natural landscape for this project, regardless of whatever promises the project promises. Economics are not more important than land and money will only corrupt and destroy our home.

Please, act and vote with integrity. Preserve our home, keep the land, air, and water clean. Our future cannot support this gross demolition of the southwest for greed. We will vote out any that support this heinous misallocation of trust.

Sincerely,
KC Washburn
