

Kerri Barber

This should not be approved as it violates the Federal Clean Air Act and poses undue risks to life and property for residents. Further, this company is using black hat techniques to mislead the public time and again. They prove themselves untrustworthy.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste.

If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.

Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.
