

Declan Cunningham

We Will All Die. There is really no way of getting behind this ignorance to pollution. I am a resident of the United States of America and I am asking that you deny Yucca Growth Infrastructure's air quality permit. We as people need clean water to survive and this new data center just like the others will not only pollute the sound in the air, but also water. We need water. Humans and animal all need it. Water is like the tracks under a train to us! We quite literally require it to live. We only get one planet, so why are we destroying it? It's terrifying to think something like this could ever even be considered. Please deny the yucca growth infrastructure air quality permit. Your life depends on it.
