

Ella Fore

My Life has barely begun and it already seems like it's ending, I'm sick of constantly being afraid of my future so I'm begging and hoping that this does something. I hope that more people take action, I feel that even though I am still young I have more of a decent understanding how awful data centers are than GROWN people. I genuinely hope that these "Adults" even though they act like children, open up their eyes for once and see how much danger and risk we are putting our futures in, our planet in, and wildlife in. I hope to learn more about Data centers but until then I will sign every petition I can to stop idiotic people from ruining what could easily be protected.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
