this permit needs to be denied and we the people shall not let it be passed through, most don't have a voice to speak, don't have power to be heard and everything is getting ripped beneath theirs and our feet, this permit has no purpose for a future and is only destroying the earth and bringing us far to close to the inevitable. Given blooms history of illegal dumping, is it crystal clear there is no interest in what's best for the people but only the pockets where the money will fall into, if this permit is not denied, a public hearing should be held, including both in person and virtual and also giving the public 60 more days to review and comment
