

Vanessa Cordero

I am writing to express my concerns for our community.

Project Jupiter will bring nothing good to Doña Ana County. Our water is already scarce, our farmers and community need water and all this project will bring is pollution to our water and environment. You try to green wash it by offering clean drinking water to our community and habitat restoration when all we need is to keep data centers out of here and not create problems!

I urge the New Mexico Environment Department to deny this horrible project.

Sincerely,
Vanessa Cordero
