

Angel Melchor

Hello, I have lived in New Mexico for 15 years now, this is a very beautiful state with tons of amazing wildlife and residents, Project Jupiter is something that we cannot afford to have, in a state already scarce in water, it should be a no brainer to not let mega corporations steal recourses from the residents of the state. No matter how much they promise to reduce the water consumption and promise to find different solutions, they will keep taking more recourses until we completely run out. The Rio Grande, an integral body of Water that so many residents love, will also be under attack due to Project Jupiter, I as a New Mexican Resident do not want to lose the beauty of New Mexico, so I ask that you please stop project Jupiter.
