The wellbeing of our pProject Jupiter must not go ahead. It will be an environmental disaster in a climate that is already struggling. The environmental impact will be devastating and goes directly against NMED's mission. The public should be given an additional 60 days to review and comment on the air quality permit. The air quality permit application should be denied given Bloom Energy's history of dumping hazardous waste. If the permit is not denied, a public hearing must be held in Santa Teresa in both English and Spanish, with an option for virtual participation. Approving this permit would be government sponsored environmental racism.eople and our environment matters more than whatever these data-centers could possibly provide.
