

Felicia Sanchez

New Mexico does not need Project Jupiter!!! I want our children to have water not a data center. How will this data center affect air and water quality? What ground and air pollutants will NM be exposed to if Project Jupiter becomes a reality? How will it affect the wildlife in and around the area? What other natural resources will Project Jupiter consume/deplete? What actual benefits will this bring our state and for how long? How many permanent and temporary jobs will this produce? Do local and/or state officials receive any incentives from Planet Jupiter? I would rather not have a data center in or around NM. There are already enough data centers in our country. There are no long term benefits that are worth the damage that this will cause to our health, environment and society.

"The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."
