We need to stop putting government money towards outrageous and harmful projects such as building data centers. There is so many more beneficial outcomes that could happen if we put money towards saving our planet and ecosystems. We do NOT want anymore data centers and matter of fact, we should tear ALL of them down and allow wildlife to have their homes back. It is not fair or safe for wildlife and neither is it fair or safe for humans. According to World Health Organization, 1 in 4 people globally still lack access to safe drinking water. Placing more data centers, especially ones this big threaten the world's future especially because of climate change and ground water is depleting. We need to put a stop to this before the human race is at risk and wildlife species are bordering extinct. We didn't choose to be born onto the Earth but since it is our only planet that we can thrive on, we MUST take care of it. It is truly saddening to think of all that is going on now. We are so divided over everything; politics, opinions, wealth status, mental health, AI opinions. We must unite together and put opinions aside so that we can save our planet and prevent wildlife and possibly even the human race from dwindling down in numbers. WE SAY NO TO ANYTHING THAT IS RUINING OUR PLANET SUCH AS THESE STUPID AI DATA CENTERS!!!! WE SAY NO!!! WE THE PEOPLE SAY NO!!

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
