

Edward Woods

I believe this application should not be approved. Applicant has baited and switched its plans since day one. Original promise was all renewables, then gas turbines, now methane fuel cells. There appears to be no end to the duplicity of applicant. They cannot be trusted to act in good faith, nor fulfill promises made.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
