I'm not from New Mexico as you can see, but, why? Why destroying the limited water those communities have? Yes, eventually we need to improve, but it's not necessary to destroy.

The air is necessary for our very existence, and with Project Jupiter Data Center our air will be contaminated a lot, and when I say a lot, it's a lot.

I'm writing this comment to try my best at supporting those communities in New Mexico and try to stop the construction of the Data Center, but, I can't do it alone, so, we need to unite, we need to understand that, united, we can do it, we need to forgot all of our differences and unite like a community, so, good luck to all those people trying their best to stop this project and good luck to all those residents of New Mexico fighting for their home, thank you.
