We have survived years and years without this heavy presence of AI and data centers. We do not need any of this. We certainly do not need a gigantic data center that is going to have disastrous effects on our planet and the people in our communities. I beg of you to prioritize life over greed. AI is not a necessity. It is not improving lives. It is doing nothing but destroying our planet, harming our intelligence, and isolating people further. Think about the children in your lives. Your kids, your nieces and nephews, your grandchildren. Is this really a world you want them to grow up in? Is this really a world you want to curse them with? Just please, think before you act.

"The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."
