

Iana Nikulina

Stop building crap that ruins our ecosystems and kills our planet. We survived without those data centers before and we will survive without them now. These data centers will not prolong our life on earth, but shorten it and make it way harder, causing thousands of deaths, both animals and humans. We only have three years till the effect of climate change is irreversible, please act responsibly. The environmental impact on the communities living by those centers is massive, including air, water, land, as well as visual and noise pollution. This is truly unacceptable. We cannot endanger the population like that, as well as cannot allow to spend millions of gallons of water like that, we will not survive for long if we do.

New Mexico Environment Department should give the public an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
