

Danny Lopez

I do not support this project. New Mexico is in the midst of one of the most extreme droughts in its history. There is ample evidence that in addition to emitting pollutants, data centers require a tremendous amount of water. This is water that our state does not have. This fact is irrefutable and our leaders and elected officials know this to be true. If this project is allowed to proceed, it is clear that they do not have the best interests of our land and people in mind. I hope they choose to do the right thing and say no to Project Jupiter.
