

Anthony Tarazoff

I am against the issuance of a permit. As a nearby resident of Dona Ana County I am deeply concerned about the impact of the proposed so-called micro grid. There is nothing "micro" about this proposal, a data center that would be amongst the largest in the country. It would pollute the air at a scale larger than the rest of the county combined, waste millions of gallons of ground water, and will drastically increase energy prices in the region. Deny Yucca Growth Infrastructure a permit.
