

Caroline Snyder

We have no Earth 2. This is the Earth we were gifted with to live on and project jupiter will increase global warming. I'm and 13 year old girl from a small town in Pennsylvania, what do I know? What I do know is that I want to have a home my kids in the future can live in. I want to be able to find the love of my life and grow old with them but I can't do that if our home can no longer handle us. Think about your kids. Think about your lover. Do you want to see your kids graduate? Get married? Have kids? If you do, you'd stop this immediately.
