

Maria Martinez

As a life long resident of NM I am vehemently opposed to Project Jupiter and Yucca Infrastructure LLC. If Yucca Growth Infrastructure or Open AI and Oracle will resort to fraud in that they fraudently use names and email addresses to send false fraudulent letters of approval then that is clearly a sign that this company and all the companies involved CANNOT be trusted. NM and its land, animals and residents have a long history of abuse by the greater US. Can't find another State stupid and asleep enough to let you dump waste or steal all your water then NM is your place. Let's stop all this greed for the profit of the rich and take care of our beautiful State while we still have it. I know I am only one voice from Eldorado at Santa Fe but please let's do what's right and oppose Project Jupiter and Yucca Infrastructure.

Thank you,
Maria
