

Debbie M

Many companies have started to use ai and slowly destroy our land. People who live near these ai data centers, are having to use polluted water and have their peace disturb due to the loud noise it's causing. Your home should be somewhere safe and a place to be able to relieve yourself from your problems, not somewhere with more problems that people can't even fix or control.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
