

Nathan Moreno

The air quality in that area already isn't up to standard so why are you considering building a data center to make it worse? Along with using our water for a state that has been in a drought for over 10 years. Reject the permit and don't let this data center be built. It's disgusting and it only benefits the billionaires that don't have to live here.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
