

Kaelyn Giambrone

Im not gonna sugarcoat anything. I'm scared for what my future holds, I'm 17 as of now and I feel like the world has turned around from where it once was. I don't want to think about if im going to live or not within the next three years, and I can tell you right now this data center is not a necessity, the creator of AI looks at his creation and regrets ever making it, we do not need to make him regret it more. This data center is not detrimental to science and there is no positive that comes out with it. It's an unnecessary thing that billionaires want because they are bored. I don't know about you but I don't want to give into their boredom. This message may not be a lot nor will it be read and me leaving this may be a waste of time because who knows if anyone is gonna listen. But I don't want to go outside and not be able to breathe. All because of people with money wanted a new toy to play with and don't realize how much this can hurt not only us but the environment, they may not realize now about how much the environment does for us but without it we have nothing, we are nothing without it. We don't need this data center.. and I'm doing the best I can right now to help. But I don't know if anything will be done. I'm scared for my future. We should be able to get an additional 60 days to review on the air quality permit because we need our voices heard but it should be denied because our earth does not need any more hazardous waste. But if it is denied a hearing will be held in Santa Teresa where a lot of legal battles will happen but we can hopefully make a change.. but if people accept this permit, they need to consider the lives of those who aren't the same as them, who come from different backgrounds and who have different cultures because the residents of Doña Ana County they can be heavily affected.
