

Bethany Reilly

I'd like to voice my strong opposition to the granting of an air quality permitting action for the YGI Microgrid, and anything that is in support of Project Jupiter. Our desert community cannot sustain a project that threatens to drain our already stressed aquifers and potentially pollute our air with millions of tons of greenhouse gases. We are trading our natural resources and the health of our communities for corporate AI dominance. I am deeply disturbed by the developers' lack of transparency. Reports of canvassers submitting public comments in residents' names without consent completely undermine the integrity of this process. It's not the first time Project Jupiter has been caught lying and spreading false information. I demand a fair, honest, and transparent process that puts the residents of Doña Ana County first. I urge the New Mexico Environment Department to reject the developers' air quality permits and close the regulatory microgrid loopholes once and for all. Our air, our water, and our futures are not for sale to the highest bidder. Thank you.
