We need to start valuing nature as a society. Soon enough, our Earth will reach a point of no return regarding global warming; it seems as if these corporations don't really care. No, we do not need more data centres, we need more: trees planted, animals saved, microplastics eradicated, etc. I truly do hope this data centre doesn't get built and hurt the future of our youth and Earth.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
