The carbon dioxide pollution alone will heat our atmosphere at a much faster pace and promote the formation of even more ground-level ozone. To add 10 million tons of carbon dioxide pollution and a vague estimate of toxic emissions to our active and long-time nonattainment zone would be nothing short of blatant environmental racism. Our metro area is currently 16th worst in the nation for ozone pollution and we have received a failing grade on this air quality standard every single year since 2000. We are already breathing some of the most compromised air in the country. It is unacceptable to invite a new source of hyperscale air pollution into our communities. Children attending Santa Teresa Elementary School will sit innocently, every day, LESS THAN ONE MILE from this pollution. Three other schools, an elder care center, and three public parks sit within around 4 miles of this project. Deny this air permit. Gambling with the fragile health of our children and elders would be a complete defilement of the authority vested in you. This is unnecessary. Don't do this to the environment.
