This project is irrational, inhuman and unethical. Data centers are known to obscure the daily life of citizens: why now must you further that issue. Speaking up on the issue of climate change. Yeah, that's real. The United Kingdom faced nation wide heat increase. What is one of the roots of that change? Big AI corporations and Data centers being installed releasing carbon emissions and causing global distress. This project needs to be retracted or heavily restricted and directed to a smaller and less powerful center. Thus, avoids outrage it is already sparking and worsening the global issue.
