

Emma Sanders

As a young New Mexican born and raised I speak heavily against Project Jupiter. Yes it will bring few jobs to New Mexico however it will also take away jobs from New Mexicans as well. The environmental impacts will drastically affect our already low water supplies. My father works for the state specifically with water laws. So I have grown up knowing how important and limited our water sources are. I beg to prevent this project from going forward it will turn our gorgeous state into a truly dying desert.
