

Kira McKinney

This data center is a complete waster of time, resources, and energy. This money could have been used to solve so many other problems that the president has already gotten us into. Nobody wants these data centers except the people who will not be impacted by the aftermath which would be the people who are funding it in the first place. They have no consideration for us because they genuinely do not care. I don't know how they get up every morning.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
