

Jeny Buckley

I am firmly against Project Jupiter. The last thing this area needs is a data center sucking up what little water is here, and polluting our already vulnerable state. Additionally, with all the shady dealings, and false comments being submitted by canvassers, we can already see we are being lied to our faces about what this company actually intends to do. No one, on either side of the political aisle is cheering for this, and when New Mexicans on all sides agree something shouldn't be here, it needs to be listened to.
