

Kylie A

I think humanity will be the end of humanity. Why? AI companies are using up drinkable water for AI, Big things we do not need. We need our fresh water and no one cares, nestle and SHEIN are a problem as well, using up water and trashing our waters. We might have a shore, but we won't have drinkable water, animals are going extinct and we only have 20,000 polar bears left. Data centers are causing global warming, releasing tons of green house gases. ChatGPT alone uses 39 million gallons of water every single day. AI given the choice can kill you. AI is also biased, and will try to hallucinate you. AI will ALWAYS lie to you. We lived perfectly FINE without it. Now it's killing people. AI can and will tell you to kill people. It's trying to replicate god as well. By next year, they will have already used over 1 billion gallons of water. Our world isn't dying, we are killing it. Some states and countries already have dirty water because of ai. STOP AI.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
