

Jennifer Thompson

I don't want this data center and no one who lives here wants this shit. Fuck Oracle, fuck your AI fascist surveillance state, and fuck the corrupt, crooked bastard motherfuckers who, in secret and behind closed doors, agreed to this. Yeah, let's put a data center in an economically depressed desert area, where water is already a scarce and vital resource, so the local populace has no water and sees their utility bills exponentially increase to pay for the massive power usage this data center will need. Fuck all this AI bullshit. No more data centers and let's shut down the ones already operating. People over profits.
