We do not want a data center draining the land and resources. Every living being deserves to drink clean water and breathe clean air, and even though Project Jupiter is claiming to change their methods, this will still hurt our communities. The wealthy have no regard for the public's health. I am feeling so much stress and anxiety thinking about the possibility of Project Jupiter polluting our state, concern for the people, animals, and plants in Doña Ana. This is not the future I want. This land and its people have been exploited so much, we need to put an end to this.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
