

## Grace Stolp

I have seen a number of videos promoting the data center (Project Jupiter) that is planned to be build here in Dona Ana County and while I do see value in jobs I believe that it will damage the community more then help. Jobs can always be created however water, clean air, and local habitats cannot. To sacrifice the communities resources and beauty for a data center is a mistake and I urge to stop Project Jupiter. We need to protect our communities and environment now and for our future generations. We have a responsibility to protect and foster a healthily NM. I would hate to see the cycle of abuse and misuse of desert land and resources happen again. Please stop Project Jupiter.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste.

If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.

Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.

For years, Doña Ana County has been called a 'nonattainment' zone— this means our air quality does not meet federal government rules.
