

Victoria Lovato-Montoya

We should be redistributing funds to our local community development in schools, homeless advocacy, drug overdose preventions, healthcare, affordable housing, and social systems. The Rio Grande is the driest it has ever been. We are looking to protect New Mexico as people who oppose due to instances such as this. We oppose to protect the land of New Mexico from data centers that have been shown to affect wildlife, the environment, pollution, and more. Please do not approve this. We fiercely oppose this project due to this intention of protection and preservation.
