

To the New Mexico Environmental Improvement Board -

Project Jupiter is exactly the kind of investment that can help diversify New Mexico's economy while creating quality employment opportunities.

Communities benefit when projects generate work for local contractors, expand opportunities for skilled trades, and encourage additional private investment. I believe Southern New Mexico is well positioned for this project and respectfully support approval of the requested air quality permits.

A handwritten signature in black ink, appearing to read 'Max Velazquez', with a stylized flourish at the end.

Max Velazquez
