

Christine Donovan

We do not have the resources for any data center in NM. They need to figure out another alternative than these centers that contaminate the environment and use vital resources that belong to the community. Please do not allow or approve any allowances for any data centers. Thank you.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste.

If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.

Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.
