

Raith Addams

This permit should be denied. Project Jupiter will only harm our community's air & water quality, severely harming us. There is no benefit to having this approved. Plus the organizers of Project Jupiter have been incredibly deceptive to our community. In their advertising of events, information they share, & using personal information people share with them without their consent. They have not been honest in trying to get this approved, meaning we cannot trust the impacts they claim will be a result of Project Jupiter. We already know that projects like this harm the communities they are in. Reject this proposal! Protect the community members here!
