

Jacob Pargas

I am against this data center! The construction of this center will harm all New Mexicans and wildlife. We need water for the people, not AI. Why is AI so necessary!? Are we has human beings to lazy to use our own brains and think for ourselves!? The construction of this data center is the saddest and poorest decision can make. Say goodbye to water, say goodbye to wildlife, say goodbye to healthy organs and reproductive system. Say hello to struggle and suffering, say hello to digital tracking and micro-waves frying our body.
