

Blanca Hernandez

As a New Mexican, I strongly urge the New Mexico Environment Department to hold a public hearing on Project Jupiter and deny this air permit application.

New Mexico should not become a sacrifice zone for massive corporations seeking to profit while our communities bear the pollution, public health risks, and long-term environmental consequences. Replacing gas turbines with "methane fuel cells" does not resolve the fundamental concerns about the enormous scale and impact of this project.

Economic development should serve New Mexicans, not come at our expense. Our air, water, health, and climate are public resources, not bargaining chips for corporate interests.

New Mexicans deserve transparency, accountability, and a meaningful voice in decisions that will shape our communities for generations. Hold a public hearing, require the highest standards of environmental and public health protection, and deny this permit.
