STOP PROJECT JUPITER! Citizens do not want data centers in NM and trying to brand it as a way to help New Mexicans isn't going to work because we're not stupid. What use is more temporary job openings when you're going to permanently damage the lives of thousands of citizens in new mexico. It will pollute our water, our air, OUR LAND, the so called Land of Enchantment. The claims of loving New Mexico more than anything do Not align with polluting our land and citizens with the effects of a data center. completely selfish and disgusting is what project jupiter is.
