The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. Doña Ana County is a nonattainment zone which means the air quality does not mean federal government rules. It is unbelievable that it would be proposed to now build a plant and further destroy our environment and air quality. This permit application must be denied.
