

Ashton Johnson

I do not support the Yucca Growth Infrastructure, LLC (YGI) Microgrid Air Quality Construction Permit Application due to the potential harmful impacts it may have on air quality, public health, and the environment in our community.

The proposed project raises concerns about increased emissions, long-term environmental impacts, and potential effects on nearby residents, schools, and sensitive populations. Before any permit is approved, a thorough evaluation of the cumulative health and environmental risks should be conducted, and the community should be provided with clear, transparent information regarding the project's potential impacts.

I urge regulators to prioritize the health, safety, and quality of life of local residents and deny the permit until these concerns have been adequately addressed.
