

Andy Anonymous

This has to be a joke. Our summers are like nothing before and you want to make another data centre? Animals including humans, are dying because of the water shortage. At this point there's almost no going back. And I know that scientists will tell you that there are planets like earth or even better than earth. And that in the future we will be able to travel to them. But how. How do you expect us to travel to them when all the money gets sent towards building data centres and other harmful things towards earth. There is no longer a future if we keep making stupid decisions. At this point it's humanity against humanity. It doesn't matter if you're rich or poor, black or white, gay or straight. We're all humans. We all bleed the same red. Stopping the construction of this data centre won't solve all global issues, but it will at least help. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. For years, Doña Ana County has been called a 'nonattainment' zone— this means our air quality does not meet federal government rules.
