

Liliana Hernandez

Hello there, my name is Liliana Hernandez in Albuquerque, New Mexico. It comes to great a heavy heart to see other places around the world how grossly the the AI data centers. Have become to destroy many things and c caused great harm to us all great harm to the nature that we live in, I will not stand with any types of forms of AI data centers. I will not stand for project Jupiter we want project Jupiter, stay far far away from New Mexico for many futures to come forever and always !

The project's proposed fuel cell powered grid is concerning for many reasons:

- * It would produce a high level of greenhouse gas and toxic pollutants.
- * This technology generates toxic waste, and the process for handling this waste is still unclear.
- * Fuel cell technology or a centralized waste system has never been tried at this scale.
- * Surrounding communities' air will be severely impacted by this development.
- * and the pollute waters we drink and use to eat with and give to our what loved ones our babies and elders our families
