

Michael Sullas

As someone who calls Sunland Park and Doña Ana County home, I'm writing to express my strong support for Project Jupiter. This project will bring good-paying jobs, long-term economic opportunity, and meaningful investment in the schools, infrastructure, and water systems our community depends on.

I also support Project Jupiter's commitment to protecting local resources. The project will operate independently from the local power grid, helping ensure local ratepayers do not see higher electricity bills, and its updated energy approach is designed to help protect local air quality.

These are the kinds of investments that can strengthen our community for years to come, and I respectfully urge the New Mexico Environment Department to approve Project Jupiter.

Sincerely,
Michael Sullas
